

SwiftShip Tracker

Use Case Scenario

"Customers often face delays and confusion while booking, tracking, and managing parcel deliveries because they need to call support or use multiple apps. A conversational AI agent can simplify this by allowing customers to book parcels, get live tracking, and manage deliveries in one place.

Objective:

A comprehensive Parcel Management Portal on Salesforce CRM that enables customers to book parcels, track delivery status, and manage shipments through an intuitive and user-friendly interface. Agents can easily update parcel details, delivery timelines, and status to ensure transparent customer communication.

Student Outcomes:

Hands-on Experience with Salesforce Development: Students gain practical skills in configuring custom objects (Parcel_c), automating processes with Flows, and integrating real-time CRM functionalities.

Understanding of CRM Project Lifecycle: Students learn the complete end-to-end process from requirement gathering to deployment in Salesforce.

Problem-Solving Skills: Students develop the ability to design, troubleshoot, and implement parcel tracking solutions in a CRM environment.

System Requirements:

Hardware Requirements:

Computer with minimum 4 GB RAM, Dual-core processor

Stable internet connection

Software Requirements:

Salesforce Developer Edition Org

Modern Web Browser (e.g., Google Chrome, Firefox)

Skills Required:

Salesforce Platform Expertise

Data Modeling & Security Management

Automation with Flows
